# PRESIDENT'S LETTER

## *Stanley King*

Greetings All!

It is hard for me to believe that here it is December and that in about two weeks we will bid a fond adieu to 2011! For the life of me I cannot tell what happened to 2011, it seems to have gone by in a flash. My grandfather always said that the older you get, the faster time seems to go by—thanks, Grandpa, I guess this means I'm getting older.

Elsewhere in this bulletin I have asked our Editor to reprint a letter I received from Art Johnson of New Orleans Geological Society regarding geologist registration in Louisiana. It seems that, if you wish to be registered there, the contents of his letter should be of great interest to you.

Please note that the call for papers for the 2012 GCAGS convention in Austin has been extended. I'm sure you have received notice for same.

As is our custom, we will not have a professional luncheon meeting in December but will resume our schedule in January. Neil tells me our January speaker will be Layton Payne with Geotrace. More on his talk my next letter.

By now I suppose Christmas preparations are in full swing—and if they're not for you, I'm guessing you're either a Scrooge or really late in starting! I would like to take this opportunity to wish everyone a joyous Christmas and a prosperous new year. This is yet another chance for each of us to reflect upon the year gone by and its blessings.

As we used to say in elementary school the last day before Christmas break: "see you next year".

Stanley King

April 5, 2012

May 3, 2012

# **MGS LUNCHEON SPEAKER:**

## **Oil and Gas Finders Unite!**

**New exploitation techniques in resource plays benefit geologists, engineers, and geophysicists alike**

Gary Perry, VP, Reservoir Services, Geotrace

Your company is actively drilling wells. The geophysicists can map time horizons using seismic and get solid correlations with synthetic seismograms from pilot holes. The geologists have little problem in correlating wells in the zone of interest and the engineers have plenty of production data to analyze in the area.

Unfortunately, the time horizons lack enough detail to keep the bit in zone, the well log correlations are uncertain and the difference between good wells and mediocre wells are determined in hindsight. How can you more easily predict good wells to exploit a resource play? The answer: combine the data used by engineers, geologists, and geophysicists using novel methods to produce a detailed picture of the lithology and fluids in the zone of interest, leading directly to better informed decisions.

The processes that help unite these disciplines include deriving rock properties from seismic and well data, azimuthal fracture analysis, microseismic integration, and reservoir simulation. Examples in several conventional and resource plays will be presented.

## **Biography**

**Gary Perry** has been in the industry since 1974 and studied Geology (with emphasis on Geophysics) at the University of Texas. He is currently Vice President, Reservoir Services, for Geotrace and has been with the company for over 25 years. Gary was previously with Geo-Search Corporation from 1974 to 1986 where he performed basin velocity studies in several onshore U.S. basins before going into seismic processing and then reservoir studies.

Standing left to right, Larry Baria, Dr. Charles Neill, Hindman Doxey, Mike Harmount and George Vockroth (winner of the wet t-shirt contest).  
Exuma, Bahamas geology field trip, 1997.

## 2012 *Oil History* **Symposium**

**March 8-10  
Houston, TX**

# GEO LINK POST

**USGS TAPESTRY OF TIME AND TERRAIN** <http://tapestry.usgs.gov> The CCGS is donating to all of the 5th and 6th grade schools in the Coastal Bend. Check it out—it is a spectacular map. You might want a framed one for your own office. The one in my office has glass and a metal frame, and it cost \$400 and it does not look as good as the ones we are giving to the schools. Call Owen 510-6224 if you want one for your office for \$150. Duncan, Mike, Chris, Dave, Bob Randy, Seb., Kevin, Ken, Craig, Patrick, Robert.

**FREE TEXAS TOPO'S** <http://www.tnris.state.tx.us/digital.htm> these are TIFF files from your state government that can be downloaded and printed. You can add them to SMT by converting them first in Globalmapper. Other digital data as well.

**FREE NATIONAL TOPO'S** [http://store.usgs.gov/b2c\\_usgs/b2c/start/\(xcm=r3standardpitrex\\_prd\)/.do](http://store.usgs.gov/b2c_usgs/b2c/start/(xcm=r3standardpitrex_prd)/.do) go to this webpage and look on the extreme right side to the box titled TOPO MAPS DOWNLOAD TOPO MAPS FREE.

<http://www.geographynetwork.com/> Go here and try their top 5 map services. My favorite is 'USGS Elevation Date.' Zoom in on your favorite places and see great shaded relief images. One of my favorites is the Great Sand Dunes National Park in south central Colorado. Nice Dunes.

<http://antwrp.gsfc.nasa.gov/apod/astropix.html> Astronomy picture of the day — awesome. I click this page everyday.

<http://www.spacimaging.com/gallery/iowek/iow.htm> Amazing satellite images. Check out the gallery.

<http://www.ngdc.noaa.gov/seg/topo/globegal.shtml> More great maps to share with kids and students.

[www.geo.org](http://www.geo.org) Don't forget we have our own web page.

<http://micro.magneet.fsu.edu/primer/java/scienceoptiscu/owersof10/>

<http://asterweb.jpl.nasa.gov/galery/default.htm> Great satellite images of volcanoes

<http://terra.nasa.gov/gallery/> More here

[www.ermapper.com](http://ermapper.com) They have a great free downloadable viewer for TIFF and other graphic files called ER Viewer.

[www.drillinginfo.com](http://drillinginfo.com) This is an incredible (subscription) well and completion data service for independents. Can be demo'ed for free.

<http://terrasrver.com/> Go here to download free aerial photo images that can be plotted under your digital land and well data. Images down to 1 meter resolution, searchable by Lat Long coordinate. Useful for resolving well location questions.

<http://www.fs.fed.us/gpnf/volcanocams/msh/> This is a live cam of Mt. St. Helens refreshed every 5 minutes. At the bottom are old videos of past eruptions in this cycle. It is worth a watch especially now.

# Louisiana Board of Professional Geoscientists

As you may know, the Louisiana Board of Professional Geoscientists was created by Act 974 of the 2010 Louisiana Legislative Session. Like most things run by the state, it is underfunded and behind schedule. About the only thing done so far was the election of Dr. Madhurendu Kumar as acting Chairman of the Board, even though there is no board as of yet. Unfortunately, there are several dates and deadlines involved with the board. And please keep in mind that I just came into possession of this information this week. But anyone applying for the Professional Geoscientist designation before January 1, 2012 will not be required to submit a written examination if they meet other statutory requirements. Here is the rub: At this time, there is no application, examination, or statutory requirements. I spoke to Dr. Kumar yesterday, and he is offering the following remedy, to quote ~~put everyone's~~ mind at peace. If you submit a letter to him, stating your name and personal information, and that you intend to apply for P.G. designation, he will consider that as an application that can be grandfathered in. And you can even email him. Dr. Kumar also told me that he is going to lobby to have the grandfather date pushed back, as the board is far from up and running, but that will take, LITERALLY, an act of the Legislature. So there is no way of knowing if and when that will happen. So I am going to recommend to everyone that is interested in having the P.G. designation, they should go ahead and act now.

Physical Address: Dr. Madhurendu Kumar

## 61<sup>st</sup> GCAGS Annual Convention

October 16 - 19, 2011

Veracruz, Mexico

### GULF COAST ASSOCIATION OF GEOLOGICAL SOCIETIES GOM GEOLOGY GOES BEYOND BORDERS!

An ancient Aztec icon, **OLLIN**, inspired the 61<sup>st</sup> GCAGS Annual Convention. Ollin represents transformation and creative evolution and also symbolizes the idea AMGP's geologists have about this Convention expressed by its theme: "**Sharing knowledge to add value**". The convention features a first-class technical program in the relaxed ambiance of the port city of Veracruz.

For the very first time you will have a chance to attend a meeting offering an integrated technical program with an unabridged regional vision of the geology of the Gulf of Mexico.

- 155 technical presentations featuring Deepwater Setting, Geology, and Economics: 95 from southern and western GOM, 53 from northern GOM, and 7 from Cuba.
- Symposium: "Jurassic Regional Framework and Reservoirs in the Gulf of Mexico".
- A luncheon conference.
- 6 short courses including *Fractured reservoirs with examples from southern Mexico and Petroleum provinces of Mexico*.
- 3 field trips to classic localities of eastern and southeastern Mexico: Chicontepec, Sierra Madre Oriental, and Sierra de Chiapas.
- Exhibition including networking events.

**Student activities and spouse/guest programs are an integral part of the Convention.**

### DON'T MISS THIS LANDMARK CONVENTION!

For more information visit:

[www.gcags2011.com](http://www.gcags2011.com)

We look forward to seeing you all in Veracruz!

## **Do you have any articles that you want to share with the MGS membership?**

Something you read online or something you wrote.

Please email them to the MGS Editor at [mgs@treetop.us.com](mailto:mgs@treetop.us.com).

We would like to add more content from the membership.

Attention MGS Members:

**June 2012** will be the last month the MGS Bulletin will printed and mailed out. From that point on the only version will be in digital .PDF file format.

## **MGS BOLAND SCHOLARSHIP FUND**

The Society's L. F. Boland Scholarship Fund is open to donations (tax deductible) year round. Your contribution will help the Society recognize and reward outstanding earth science students at its annual Honors Day meeting on April 7th, 2011.

Since inception in 1980, the Society has honored 104 students with the Boland Award. If you would like to contribute, please contact Dave Cate at 601-718-9397 or mail your check (L. F. Boland Scholarship Fund) to him at 217 W. Capitol St., Jackson, MS 39201.

The MGS gratefully acknowledges the following contributors to the L. F. Boland Scholarship Fund for the 2011-2012 year.

Maurice Birdwell      Kieth Gourges  
Maurice Meylan      Philip Reeves  
Julius Ridgway      Dave Cate

# Get More from your Core

With reservoirs becoming increasingly complex, you need the most accurate information you can get to better understand your reservoir.

Weatherford Labs helps you get more from your core by combining an unsurpassed global team of geoscientists, engineers, technicians and researchers with the industry's most comprehensive, integrated laboratory services worldwide. From core analysis, sorption, geochemistry and isotopic composition to detailed basin modeling and comprehensive data packages, we provide you with real reservoir rock and fluid information that hasn't been distilled by a simulator or iterated by software.

We call it "The Ground Truth™" – giving you the accurate answers you need for better reservoir understanding. You'll call it a better return on your reservoir investment. To learn more, contact [TheGroundTruth@weatherfordlabs.com](mailto:TheGroundTruth@weatherfordlabs.com).

## Denbury Resources, Inc.

Denbury Resources, Inc. is a growing independent oil and gas company. The Company is the largest oil and natural gas operator in Mississippi and Montana, owns the largest reserves of CO<sub>2</sub> used for tertiary oil recovery east of the Mississippi River, and holds significant operating acreage in the Rockies, Permian Basin, Mid-Continent and Gulf Coast. The Company's goal is to increase the value of acquired properties through a combination of exploration, drilling and proven engineering extraction practices, with its most significant emphasis relating to tertiary recovery operations.
