<b>Historian</b>	Stanley King	Independent	(601) 842-3539

# PRESIDENT'S LETTER

*Jim Files*

Hello fellow members!

I was visiting with our fellow society member, Tony Stewart the other day about switching from PetraSeis software to Kingdom's SMT. We were complaining about having to learn something new and asking, "when, oh when, will we ever have to stop learning?" Answer....never! We are forced to "stay forever young" by keeping up with changes in software, hardware, conventional or unconventional exploration, and the list goes on.

Most summers we typically hire a geology student from Millsaps College. I usually explain to them how we used to do all this mapping with a pencil and paper. It turns out that at least one of their professors, Stan Galicki, requires them to use pencil and paper, the old school way, for their early projects. Not a bad way to start out. I remind the students of this: Change is inevitable, you might as well embrace it!

I look forward to seeing all your smiling faces on October 4<sup>th</sup> at River Hills to hear our very own Steve Walkinshaw. Until then, keep pushing your mouse (or pencil).

Best Regards,

Jim Files

# MGS MEETING SCHEDULE

When	What/Who	Where
September 13, 2012	Fall BBQ	Jackson Yacht Club-5:30pm
October 4, 2012	Steve Walkinshaw The Lower Brown Dense Lime Trend	River Hills – 11:30am
November 8, 2012	Morgan Brown Prestack Depth Migration for “Easy” Onshore Plays	River Hills – 11:30am
TBD	Christmas Party and Dance	Colonial Country Club
January 10, 2013	TBD	River Hills – 11:30am
February 14, 2013	Kirk Barrell Tuscaloosa Marine Shale	River Hills – 11:30am
March 14, 2013	TBD	River Hills – 11:30am
April 11, 2013	Boland Scholarship Awards	River Hills – 11:30am
May 9, 2013	Spring Fling	Jackson Yacht Club– 5:30pm

April 4, 2013

May 2, 2013

# OCTOBER SPEAKER

*Steve Walkinshaw*

## **“The Lower Smackover Brown Dense Lime Trend: A View From 30,000 Feet”**

Interest in the Brown Dense Lime Trend is increasing as several operators attempt to establish its viability as an unconventional oil resource play. Currently, most of the industry attention has been focused on the South-west Arkansas / North Louisiana area, where drilling activity has been quite active in the past 12-18 months. However, trend leasing has also intensified elsewhere, and the focus is about to shift or evolve eastward to include West-Central Mississippi as well as other adjacent areas. The Brown Dense Lime is the most prolific source rock in the U.S. Gulf Coast, and has already produced large volumes of oil, gas and condensate from in-situ porous reservoirs encountered in many areas, especially Southeast Mississippi and South Alabama. From a “conventional” standpoint, there are many different types of porosity that can develop within the heterogeneous Brown Dense Lime, and operators exploring the Trend should also take into account the possibility of encountering minor amounts of H<sub>2</sub>S within the oil and condensate windows, but not be discouraged from developing potentially prolific, porous reservoirs. It is important to understand the profound impact of the ancestral Mississippi River upon the enrichment of organic content, the development of sandstone porosity (“storage”), and the distribution of H<sub>2</sub>S within the Brown Dense Lime.

### **Steve Walkinshaw, President, Vision Exploration LLC**

Steve Walkinshaw is a graduate of Millsaps College and the President of Vision Exploration LLC, based in Madison, Mississippi. He began his full-time career in the oil business in 1981, serving as District Geologist for Hughes Eastern Corp. for nine years. In 1989 Steve founded and managed Cougar Exploration, a successful business unit of Paramount Petroleum, until it was acquired by Nuevo Energy in 1992. He remained employed by Nuevo until 1996, after which he was invited by Dudley Hughes to return as Exploration Manager of Hughes-Rawls International (HRI), and was later promoted to Executive Vice-President. In 2000, Steve left HRI and founded Vision Exploration, which over the course of twelve years has become one of the most active independents in the state. He has many oil and gas discoveries and successful field redevelopment projects to his credit, primarily in South Louisiana, Mississippi and Alabama.

Steve is a Registered Professional Geologist in Mississippi; a 28-year member of AAPG, a DPA Certified Petroleum Geologist, and a member of AIPG. In addition to his past service as Secretary, Treasurer and President, he has served as Webmaster for the Mississippi Geological Society (having built and maintained the Society's website) since 2002. Steve is also a long-standing member of the State Mapping Advisory Committee (SMAC) of Mississippi, which serves to annually review, discuss and approve the ongoing surface mapping efforts of the Mississippi DEQ Office of Geology.

In 2002, Steve was honored by NOGS as the recipient of the Society's Best Paper Award for 2001. Steve's presentation was entitled "Magma, Salt and the Chicxulub Impact: Intriguing Implications for the End of the Cretaceous in the Mississippi Embayment". This past May, he debuted a condensed version of this Brown Dense Lime presentation during the Emerging Trends Panel Session at Hart Energy's Third Annual DUO (Developing Unconventional Oil) Conference, held in Denver, Colorado.

# BOLAND SCHOLARSHIP WATCH

Faculty & Students,

This is a new year and the Mississippi Geological Society along with the Boland Scholarship Fund would like to remind you that we want to honor the most outstanding overall students for the 2012-2013 year.

Each year, the Boland Scholarship awards 1 student from each institution a check that rewards students for their hard work and dedication to the Geosciences and their community.

We look forward to a great year and hope to see you at our monthly meetings.

Best Regards,

Matt Caton  
Editor

THE UNIVERSITY OF  
SOUTHERN

Jackson, MS 39205-0422**

# ARTICLE OF THE MONTH

## *The Price of Oil, Speculation and the Election*

If the oil market were functioning in an unfettered way, reflecting the true dynamics of supply and demand, there would be no reason for prices to be this high. To quote Sen. Bernie Sanders (D. Vt.) "The price of oil, while declining somewhat in recent weeks, was over \$95 a barrel today. That's about \$30 higher than two years ago. The theory behind the setting of oil prices is that its price is determined by the fundamentals of supply and demand. The fact of the matter is that there is more supply and less demand today than there was two years ago when gasoline prices averaged \$2.44 a gallon" ('Stop oil Speculation Now' Huffington Post 6/15/11).

Perhaps even more succinctly and altogether applicable today were those words of truth uttered by the late Leon Hess, founder and Chairman of Hess Oil, and indisputably one of the Grandees of oildom, before the Senate Committee on Government affairs on Nov. 1, 1990 (I repeat, 1990): "I'm an old man, but I'd bet my life that if the Merc (the New York Mercantile Exchange) was not in operation there would be ample oil at reasonable prices all over the world."

The issue has only accelerated as highlighted in Senator Sanders commentary: "Ten years ago, speculators only controlled 30 percent of the oil futures market. Today Wall Street speculators control more than 80% of the market."

In effect oil is no longer priced, as it was in my trading days, on the basis of a "wet barrel." Those trading the market at the time were either the producers, or consumers or physical traders who took actual title to the oil and chartered vessels to deliver the oil to consumers around the world. Today oil is no longer priced as a wet barrel but rather as a financial instrument having little bearing on the underlying dynamics of supply and demand, being traded by myriad speculators most whom never have produced a barrel of oil, nor taken delivery, nor consumed a barrel of oil and in many cases have never seen a real oil well, or visited a refinery. Yet in large measure, their actions determine what we pay for a gallon of gasoline by buying and selling not "wet" barrels of oil, but financial instruments that well could be labeled "paper barrels."

In a report issued earlier this year by the St. Louis Federal Reserve Bank commenting "... unprecedented growth in commodity index trading coincided with a boom in commodity prices; some have extended that observation into a conclusion that speculation by financial traders- and not supply and demand- drove the recent boom in commodity prices. This kind of argument is perhaps strongest in oil market, where large investment banks. Hedge funds and other investment funds have invested billions of dollars in oil futures over the past decade." The study wisely admonishes "Disentangling the true drivers of oil prices is a critical first step for allocating resources and designing good policy."

## ARTICLE Cont

April 2011, in a bright and hopeful moment responding to the pernicious influence of oil futures trading on oil prices, the Obama administration amid fanfare announced the formation of the "Oil/Gas Pricing Fraud Panel." It was meant to be a call to investigate whether oil prices were a true reflection of market forces or whether they had been impacted by speculation or worse, manipulation. Regretfully and perhaps better said, irresponsibly, now more than a year and a half after its formation, nothing, nada has been heard from this august body.

Couple this with the ongoing dereliction of Commodity Futures Trading Commission (CFTC) and the administration policies policing and countering the malign impact of oil commodity trading on the futures exchanges has been both irresponsible and non-existent.

Consider that on July 27, 2009 the Wall Street Journal published the article, "Traders Blamed For Oil Spike" reporting that "The Commodity Futures Trading Commission plans to issue a report next month suggesting that speculators played a significant role in driving wild price swings in oil prices- a reversal of an earlier CFTC position. Well, now three years later we are still waiting for the report.

But the CFTC's ineffectuality goes further. According to the Wall Street reform act, Dodd-Frank, required the CFTC to impose strict limits on the amount of energy futures that could be traded by speculators by January 17, 2012. We are now nearing the end of September and the CFTC still has not imposed any limits whatsoever, clearly in contravention to the stated law of the land. To quote Senator Sanders musings this June past: "Last month, six senators and I held a meeting in my office with Gary Gensler, Chairman of the CFTC. Unfortunately I was very disappointed in both the tone of the meeting and the complete lack of urgency at the CFTC with respect to cracking down on oil speculators as required by law."

The issue of speculation, and possible manipulation of oil prices, other than lip service, is clearly not being addressed by this administration. It is an issue that touches virtually every American consumer where it hurts most directly, in paying for his day-to-day needs of gasoline, heating oil and on. It needs be high on the agenda of national discourse as another four years of neglect on this issue could be disastrous!

Couple this with CFTC inaction it becomes a broad condemnation of the Administration's inattention to an issue that impacts the pocketbooks of virtually every American.

# GEO LINK POST

**USGS TAPESTRY OF TIME AND TERRAIN** <http://tapestry.usgs.gov> The CCGS is donating to all of the 5th and 6th grade schools in the Coastal Bend. Check it out—it is a spectacular map. You might want a framed one for your own office. The one in my office has glass and a metal frame, and it cost \$400 and it does not look as good as the ones we are giving to the schools. Call Owen 510-6224 if you want one for your office for \$150. Duncan, Mike, Chris, Dave, Bob Randy, Seb., Kevin, Ken, Craig, Patrick, Robert.

**FREE TEXAS TOPO'S** <http://www.tnris.state.tx.us/digital.htm> these are TIFF files from your state government that can be downloaded and printed. You can add them to SMT by converting them first in Globalmapper. Other digital data as well.

**FREE NATIONAL TOPO'S** [http://store.usgs.gov/b2c\\_usgs/b2c/start/\(xcm=r3standardpitrex\\_prd\)/.do](http://store.usgs.gov/b2c_usgs/b2c/start/(xcm=r3standardpitrex_prd)/.do) go to this webpage and look on the extreme right side to the box titled TOPO MAPS DOWNLOAD TOPO MAPS FREE.

<http://www.geographynetwork.com/> Go here and try their top 5 map services. My favorite is 'USGS Elevation Date.' Zoom in on your favorite places and see great shaded relief images. One of my favorites is the Great Sand Dunes National Park in south central Colorado. Nice Dunes.

<http://antwrp.gsfc.nasa.gov/apod/astropix.html> Astronomy picture of the day — awesome. I click this page everyday.

<http://www.spacimaging.com/gallery/ioweek/iow.htm> Amazing satellite images. Check out the gallery.

<http://www.ngdc.noaa.gov/seg/topo/globegal.shtml> More great maps to share with kids and students.

[www.geo.org](http://www.geo.org) Don't forget we have our own web page.

<http://micro.magneet.fsu.edu/primer/java/scienceoptiscu/owersof10/>

<http://asterweb.jpl.nasa.gov/gallery/default.htm> Great satellite images of volcanoes

<http://terra.nasa.gov/gallery/> More here

[www.ermapper.com](http://www.ermapper.com) They have a great free downloadable viewer for TIFF and other graphic files called ER Viewer.

[www.drillinginfo.com](http://www.drillinginfo.com) This is an incredible (subscription) well and completion data service for independents. Can be demo'ed for free.

<http://terraserver.com/> Go here to download free aerial photo images that can be plotted under your digital land and well data. Images down to 1 meter resolution, searchable by Lat Long coordinate. Useful for resolving well location questions.

<http://www.fs.fed.us/gpnf/volcanocams/msh/> This is a live cam of Mt. St. Helens refreshed every 5 minutes. At the bottom are old videos of past eruptions in this cycle. It is worth a watch especially now.

# GEOLOGY POST

## ARTICLES, PAPERS or NEWS?

**ATTENTION!!!!!!** Industry, Professors and Students:

We would like to add a dedicated section that includes more content from the industry and our schools.

Submissions can include anything from professional papers, thesis abstracts, job opportunities to pictures. Anything!!!!

If you have any information or news you would like to share with the Society **PLEASE** email them to the MGS Editor at:

[mcaton@tellusoperating.com](mailto:mcaton@tellusoperating.com)

Thanks & Regards,

Matt Caton  
Editor

"A company committed to excellence and achieving success while providing professional permitting acq. & project mngt. with the client's interests & concerns top priority"

# Get More

# from your Core

With reservoirs becoming increasingly complex, you need the most accurate information you can get to better understand your reservoir.

Weatherford Labs helps you get more from your core by combining an unsurpassed global team of geoscientists, engineers, technicians and researchers with the industry's most comprehensive, integrated laboratory services worldwide. From core analysis, sorption, geochemistry and isotopic composition to detailed basin modeling and comprehensive data packages, we provide you with real reservoir rock and fluid information that hasn't been distilled by a simulator or iterated by software.

We call it "The Ground Truth™" – giving you the accurate answers you need for better reservoir understanding. You'll call it a better return on your reservoir investment. To learn more, contact [TheGroundTruth@weatherfordlabs.com](mailto:TheGroundTruth@weatherfordlabs.com).

**Denbury Resources, Inc.**

*Denbury Resources, Inc. is a growing independent oil and gas company. The Company is the largest oil and natural gas operator in Mississippi and Montana, owns the largest reserves of CO<sub>2</sub> used for tertiary oil recovery east of the Mississippi River, and holds significant operating acreage in the Rockies, Permian Basin, Mid-Continent and Gulf Coast. The Company's goal is to increase the value of acquired properties through a combination of exploration, drilling and proven engineering extraction practices, with its most significant emphasis relating to tertiary recovery operations.*
