PRESIDENT'S LETTER

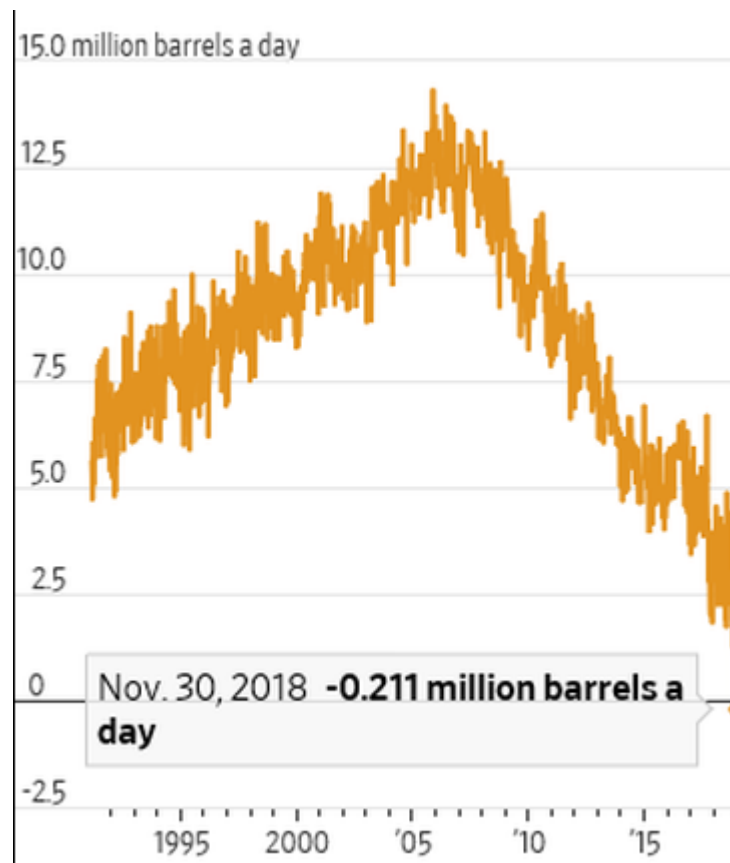

Dr. David T. Dockery III, RPG

David Dockery, RPG

According to the December 7, 2018, edition of *The Wall Street Journal*, the country's current fracking boom propelled the U.S. to the symbolic milestone of "energy independence." For the first time since 1973, the U.S. has become a net exporter of oil. The *Journal* noted that this "seemed unthinkable just 10 years ago." News of the shift from importer to net exporter was detailed in weekly data from the U.S. Energy Information Administration. The country's shale production now makes it one of the top oil producers, a fact that is reshaping global markets. U.S. oil and natural gas production is increasing at a rapid pace, and billions of dollars are being spent to build infrastructure for exports, especially along the Texas Gulf Coast. On the week that ended November 30, 2018, the U.S. exported 3.2 million barrels of oil a day and about 5.8 million barrels a day of gasoline, diesel, jet fuel, and other petroleum products.

With all the U.S. production success, we hope to see everyone at our spring 2019 MGS meetings.

GULF COAST ASSOCIATION OF GEOLOGICAL SOCIETIES

CALL FOR PAPERS for the GCAGS JOURNAL

**GCAGS
JOURNAL**

The peer-reviewed journal for Gulf Coast geoscience.

Open Access • Fast Track • No Page Charges

The GCAGS Journal, the Journal of the Gulf Coast Association of Geological Societies, is soliciting manuscripts for the 2019 edition (our 8th volume). This peer-reviewed journal is focused on publishing studies of the geology of the onshore and offshore Gulf of Mexico. For the 2019 Journal, we are soliciting manuscripts particularly focused on the following themes, although other themes are welcome: Deepwater Gulf, Modern Technologies, Shale Play Assessment, Oil and Gas Field Studies, and the Mexico portion of Gulf of Mexico Basin.

Please submit an extended abstract of at least 600 words, including 1–2 representative figures, to the GCAGS Journal Editor, Bob Merrill, at rmerrill@catheart.com by December 15, 2018. Once topic is approved, a full manuscript must be submitted by April 2, 2019. GCAGS Convention presentations of Journal submissions are encouraged but not required. The 2019 Convention is scheduled for Houston, Texas.

Please visit www.gcags.org for open access to our seven previous volumes.

INTERESTED IN SERVING AS AN ASSOCIATE EDITOR?

The GCAGS Journal, a peer-reviewed Journal published yearly by the Gulf Coast Association of Geological Societies, is soliciting member societies for associate editors. You would be involved with managing the peer-review process for 1 to 3 manuscripts that are submitted for publication in the GCAGS Journal. Ideally associate editors will contribute their local knowledge and expertise to the editorial process. If you are interested in being an Associate Editor for the GCAGS Journal, please contact Bob Merrill at rmerrill@catheart.com.

To the MGS Members:

Re: Mississippi Gem and Mineral Society

As most of you are aware the Mississippi Gem and Mineral Society (MGMS) sponsors an annual Gem, Mineral and Fossil show at the Coliseum each February. What you probably don't know is that the MGMS is very active and meets monthly at its own building in Byram where they have lapidary and various jewelry classes, swap meets, and geologic discussions. They also conduct frequent local and regional fieldtrips for mineral and fossil collecting. The MGMS has a very active children's program where jewelry making, local fossil hunting and gravel pit collecting are frequent events.

I would encourage each of you and especially those of you with children or grandchildren who like to get outdoors and collect rocks to join this very active group. Individual and family memberships are inexpensive. I would recommend this for a Christmas or birthday present; it is a fun thing to do, it's recreational and educational. Please go to the Mississippi Gem and Mineral Society website and sign up.

Sincerely,

Lawrence R. Baria

The Mississippi Gem and Mineral Society (MGMS) was established to promote knowledge and the enjoyment of activities related to the earth sciences. MGMS activities focus on rocks, minerals, fossils, lapidary arts, and jewelry making.

It's amazing how diverse this rock hobby is. There's something for every interest and its a hobby that the entire family can enjoy together.

Visitors are always welcome to join us at one of our regular meetings held at our MGMS Lapidary School. We're located just a few miles south of the capitol city of Jackson at 176 Tazan Avenue, Florence, Mississippi.

JOB POSTING

Sr. Geologist/Reservoir Engineer-01012791

Description

Do you have a passion for oil and gas exploration & development, in a variety of geographies, and a desire to live in the Pacific Northwest? As a Senior Geologist – Reservoir Engineer located at Weyerhaeuser's Seattle Headquarters, your primary responsibility will be oil and gas prospect generation and marketing, along management of our royalty production streams, on Weyerhaeuser's 13 million mineral acres, underlying our timberlands in continental United States.

In this role, you will have access to an extensive geologic and seismic data sets and you will work with our Senior Geophysicist and Land Manager to generate prospects and promote drilling activity, primarily in the North Louisiana Salt Basin and Gulf Coast regions. In this position, you will also be responsible for the petrophysics and economic modeling associated with prospect generation. This role will require a high degree of proficiency with the preparation of prospect marketing packages, and with presentations to a wide variety of oil and gas companies and conventions. Additionally, you will also manage our royalty production stream, including annual reserve reporting and revenue forecasting. You will also have the responsibility to assess oil and gas potential in a wide variety of geologic terrains, and to support real estate and timberlands divestitures and acquisitions. We expect you to use your strong interpersonal, communication, and conflict resolution skills as you work to create strategic plans and meet financial objectives for your areas of responsibility.

At Weyerhaeuser we believe trees are a remarkable resource that can, and should, be managed responsibly to make a range of products that meet human needs, while also providing recreation, wildlife habitat, and other important ecosystem benefits. For more than a century, we've been building our reputation as a leader in sustainable forest products.

Roles & Responsibilities

- Responsible for prospect petrophysics, decline curve analysis and economic modeling.
- Manages royalty production streams, including reserve reporting and revenue projections.
- Generates oil and gas prospects on Weyerhaeuser lands, along with marketing displays and presentations, in close collaboration with the Senior Geophysicist; utilizing our extensive geophysical and geologic data bases.
- Collaborates with the Oil and Gas Team to identify potential industry partners, and to promote exploration activity.
- Responsible, along with the Oil and Gas Team, for expert prospect presentation and promotion to a wide variety of oil and gas companies, investors, and management.
- Responsible for geologic and economic evaluations of oil and gas lease offers, in partnership with the Senior Geophysicist and Land Manager.
- Responsible for geologic and economic assessment of oil and gas potential on all Weyerhaeuser lands, including recommendations regarding acquisitions and divestitures.
- Collaborates with Operations Team in evaluating performance and compliance with lease contracts
- Partners with the Oil and Gas Team for the creation of annual budgets and strategic plans.
- Responsible for the attainment of annual leasing goals and financial objectives within area of responsibility.
- Displays strong excellent interpersonal, communication and conflict resolution skills.
- Reports to Director, Oil and Gas, Energy and Natural Resources.

Qualifications

Experience: We place an emphasis on our candidate's skills and drive to get the job done. We require demonstrated experience in the upstream oil and gas industry, with an emphasis on prospect generation and marketing, in the North Louisiana Salt and Gulf Coast Basins. A background in petrophysics and petroleum economics are also essential skills for this position.

Education: Bachelor's degree or higher, Master's preferred, in geology or closely related field;

Technical Skills: eight or more years' experience in prospect generation and marketing. Full working knowledge of Petra geologic software, or equivalent, is required. Candidates with expertise in salt tectonics will receive preferential consideration. Experience with petroleum economic software, e.g., PHDWin, for decline curve analysis, economic evaluations, and volume/revenue projections is also required.

MONTHLY POST

Dr. David T. Dockery III RPG

RARE LIMPET GASTROPOD IN THE FAMILY LEPETELLIDAE FOUND IN SEDIMENT FROM FOUNDATION BORINGS FOR THE MISSISSIPPI HISTORY MUSEUM

David T. Dockery III

Sableas minuta is a small limpet-like gastropod species named by James Allen (1970) as both a new genus and new species from the Eocene of Louisiana. The holotype and paratypes A and B of this species are from the Moodys Branch Formation at the Montgomery Landing locality (on the Red River in Grant Parish, Louisiana). Paratype C is from the Saline Bayou Member of the Cook Mountain Formation at the mouth of Saline Bayou in Winn Parrish, Louisiana. The type material was illustrated by drawings (Figure 1) and not published photographs.

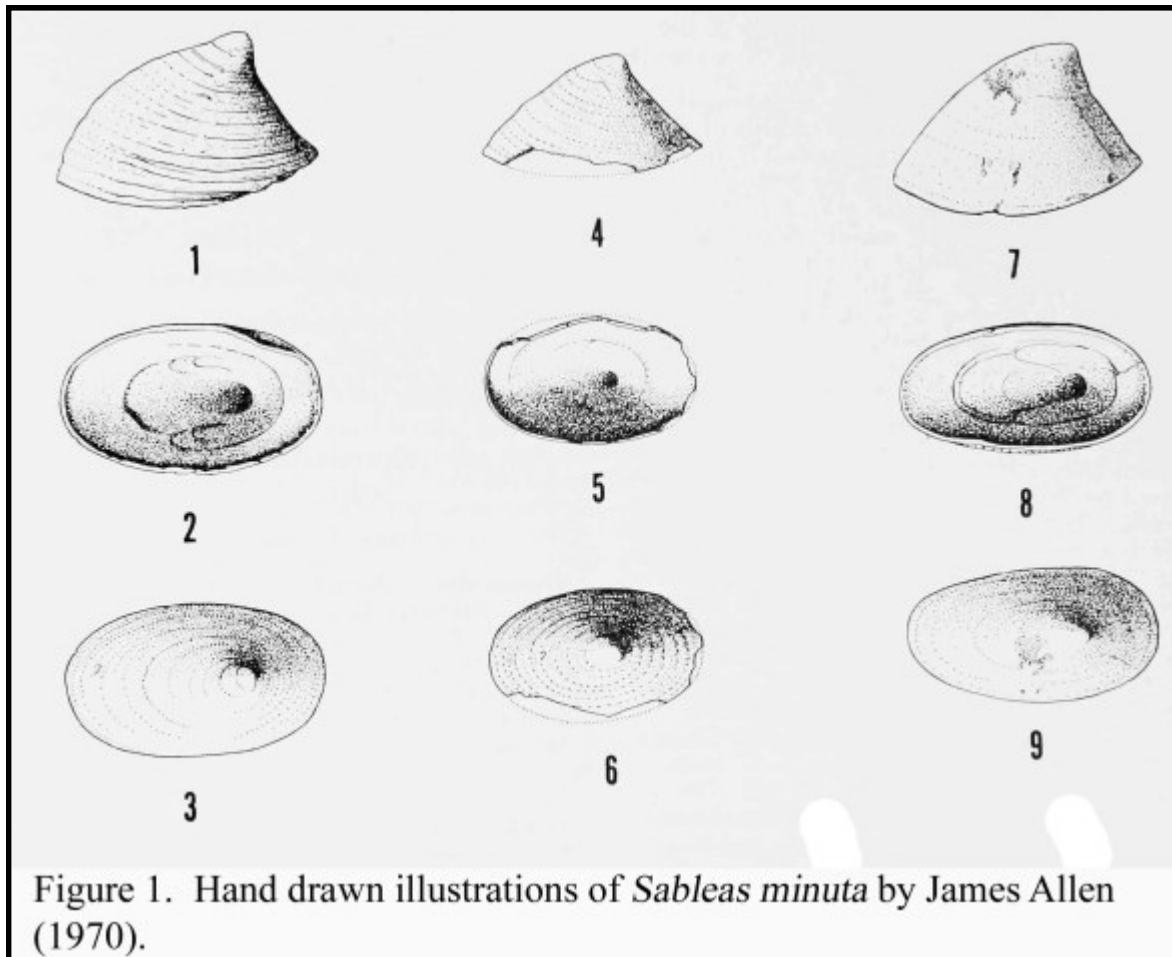

Figure 1. Hand drawn illustrations of *Sableas minuta* by James Allen (1970).

MONTHLY POST

Dr. David T. Dockery III RPG

The first photographs published for this species were two specimens from the Red Bluff Formation in Wayne County, Mississippi. The images were taken with a scanning electron microscope (Figure 2, Dockery, 1984).

Figure 2. *Sablea minuta* Allen, 1970, apertural view of specimen at left, height 0.6 mm, width 0.4 mm; apical view of specimen at right, height 2.0 mm, width 1.1 mm. Both specimens from the Red Bluff Formation, MGS locality 37. Pictures were made by a scanning electron microscope.

MONTHLY POST

Dr. David T. Dockery III RPG

When a loan of the type specimens was requested from the Paleontological Research Institution in Ithaca, New York, it was found that the types had been missing since 2007. With no other specimens available, the figured specimens from the Red Bluff Formation were used for MDEQ's website on the fossil mollusks of the Moodys Branch Formation.

<http://geology.deq.ms.gov/surface/fossils/>

In the meantime, a careful watch was made to find a specimen of *Sableas minuta* from the Moodys Branch Formation in Mississippi. At a size of 1 to 2 millimeters, and the species would fit in the space occupied by a large grain of sand. Figures 3-4 show the first specimen from Mississippi. It was found in material sieved on a #35 sieve from material taken from piling borings at the construction site of the Mississippi History Museum. Images of this specimen will be added to our fossil website.

69th Annual Gulf Coast Association of Geological Societies 2019 GCAGS Convention

October 23-25, Marriott Westchase, Houston

Hosted by the Houston Geological Society and the GCSSEPM

General Chair: Mike Erpenbeck, Vice Chair: Larry Bartell, GCAGS President: Deborah Sacrey

Submit an Oral or Poster Abstract by March 4, 2019

Convention Themes

- 1. Unconventional GOM Mudrocks and Shale Plays**
Austin Chalk, Eagle Ford, Haynesville, Eaglebine and other plays
- 2. Onshore GOM Conventional Plays, Discoveries, and Case Studies**
Louisiana and Texas Wilcox, Miocene, Yegua, and other trends
- 3. Offshore GOM Exploration and Production Studies**
Cretaceous, Miocene, Deepwater Wilcox Plays, Risking, and Dry Hole Evaluation
- 4. Over the Border: Mexico Geology and Exploration, and Caribbean Exploration**
Mexico, Cuba, Belize, Trinidad, Offshore Central America, Regional Studies
- 5. Structural Geology, Gravity, and Magnetic Case Studies**
Ground Penetrating Radar Imaging, Use of Drones, and Lidar Imaging
- 6. Gulf Coast Environmental Geology**
Subsidence & Flooding Impact, Groundwater Quality, Public Education Outreach, Environmental Studies, and Professional Licensing
- 7. Petroleum Engineers and Geologists Working Together for a Better Answer**
Estimating Reserves, GeoModeling, Economics, Waterflooding, and Permeability Enhancement
- 8. Seismic Technology and Salt Tectonics**
Depth Migration, Subsalt Processing, AVO, Seismic Attributes, and Shallow Hazards
- 9. Understanding Big Data and Computer Aided Interpretation**
Machine Learning, Visualization, Augmented Intelligence, and Pattern Recognition
- 10. The Road to Business Success**
Deals, Financing, Starting Own Company, Young Professional Careers, and Consulting

2019 Convention Oral and Poster abstracts of up to 300 words must be submitted to the Technical Chair, Linda Sternbach, by March 4, 2019.

Send abstract and contact info in a Word document to linda.sternbach@gcagshouston.com.

Authors will receive notification of acceptance by March 25, 2019

If you'd like to publish in the *GCAGS Journal*, the peer-reviewed journal of Gulf Coast geoscience, submit an extended abstract of at least 600 words, including 1-2 representative figures, to the *GCAGS Journal* Editor, Robert Merrill (rmerrill@catheart.com) by December 15, 2018.

www.gcagshouston.com

BOLAND SCHOLARSHIP WATCH

Faculty & Students,

This is a new year and the Mississippi Geological Society along with the Boland Scholarship Fund would like to remind you that we want to honor the most outstanding overall students for the 2018-2019 year.

Each year, the Boland Scholarship awards 1 student from each institution a check that rewards students for their hard work and dedication to the Geosciences and their community.

We look forward to a great year and hope to see you at our monthly meetings.

Best Regards,

Matt Caton
Editor

ARTICLES, PAPERS or NEWS?

ATTENTION!!!!!! Industry, Professors and Students:

I am adding a dedicated section that includes more content from the industry and our schools.

Submissions can include anything from professional papers, thesis abstracts, job opportunities to pictures. Anything!!!!

If you have any information or news you would like to share with the Society **PLEASE** email them to the MGS Editor at:

mcaton@tellusoperating.com

Thanks & Regards,

Matt Caton
Editor

GEO LINK POST

USGS TAPESTRY OF TIME AND TERRAIN <http://tapestry.usgs.gov> The CCGS is donating to all of the 5th and 6th grade schools in the Coastal Bend. Check it out—it is a spectacular map. You might want a framed one for your own office. The one in my office has glass and a metal frame, and it cost \$400 and it does not look as good as the ones we are giving to the schools. Call Owen 510-6224 if you want one for your office for \$150. Duncan, Mike, Chris, Dave, Bob Randy, Seb., Kevin, Ken, Craig, Patrick, Robert.

FREE TEXAS TOPO'S <http://www.tnris.state.tx.us/digital.htm> these are TIFF files from your state government that can be downloaded and printed. You can add them to SMT by converting them first in Globalmapper. Other digital data as well.

FREE NATIONAL TOPO'S [http://store.usgs.gov/b2c_usgs/b2c/start/\(xcm=r3standardpitrex_prd\)/.do](http://store.usgs.gov/b2c_usgs/b2c/start/(xcm=r3standardpitrex_prd)/.do) go to this webpage and look on the extreme right side to the box titled TOPO MAPS DOWNLOAD TOPO MAPS FREE.

<http://www.geographynetwork.com/> Go here and try their top 5 map services. My favorite is 'USGS Elevation Date.' Zoom in on your favorite places and see great shaded relief images. One of my favorites is the Great Sand Dunes National Park in south central Colorado. Nice Dunes.

<http://antwrp.gsfc.nasa.gov/apod/astropix.html> Astronomy picture of the day — awesome. I click this page everyday.

<http://www.spacimaging.com/gallery/ioweek/iow.htm> Amazing satellite images. Check out the gallery.

<http://www.ngdc.noaa.gov/seg/topo/globegal.shtml> More great maps to share with kids and students.

www.geo.org Don't forget we have our own web page.

<http://micro.magneet.fsu.edu/primer/java/scienceoptiscu/owersof10/>

<http://asterweb.jpl.nasa.gov/galery/default.htm> Great satellite images of volcanoes

<http://terra.nasa.gov/gallery/> More here

www.ermapper.com They have a great free downloadable viewer for TIFF and other graphic files called ER Viewer.

www.drillinginfo.com This is an incredible (subscription) well and completion data service for independents. Can be demo'ed for free.

<http://terraserver.com/> Go here to download free aerial photo images that can be plotted under your digital land and well data. Images down to 1 meter resolution, searchable by Lat Long coordinate. Useful for resolving well location questions.

<http://www.fs.fed.us/gpnl/volcanocams/msh/> This is a live cam of Mt. St. Helens refreshed every 5 minutes. At the bottom are old videos of past eruptions in this cycle. It is worth a watch especially now.
